

Whole Life Insurance

Whole Life Insurance can pay to your loved ones if you die. It also offers a “living” benefit. If you are diagnosed with a terminal illness and have a life expectancy of one year or less, you can request some or all of the death benefit while living. Whole Life Insurance premiums won’t increase with age, and your policy builds cash value over time.

You can use the cash value later in life to buy a smaller, “paid-up” policy with no more premiums due.
